EDUCATION

December, 2002

Ph.D., Biobehavioral Health

The Pennsylvania State University (University Park, PA)

Mentors: Judith Vicary, Ph.D. and John Graham, Ph.D.

Dissertation title: *A latent class growth model of rural adolescent drinking: An examination of the antecedents to and young adult consequences of adolescent alcohol use trajectories*

May, 1996

M.S., Exercise and Sport Science

Colorado State University (Fort Collins, CO)

Mentor: Catherine Kennedy, Ph.D.

Thesis title: *Influence of self-care education on the health locus of control and illness behavior of Mexican American women*

May, 1994

B.S., Physical Education and Sport (Health & Exercise Science Concentration)

Indiana University of Pennsylvania (Indiana, PA)

POST DOCTORAL TRAINING

2006 (As part of NIDA K01)

Mentor: Bengt Muthén, Ph.D.

University of California, Los Angeles, Graduate School of Education & Information Studies

2004-2006

Mentor: David Huizinga, Ph.D.

University of Colorado, Institute of Behavioral Sciences (Problem Behavior Program)

2003-2004

Mentors: Randall Swaim, Ph.D., Eugene Oetting, Ph.D. & Michael Slater, Ph.D.

Colorado State University, Tri-Ethnic Center for Prevention Research

ACADEMIC POSITIONS

2018-present

Professor (Assistant Professor from 2006-2012, Associate Professor from 2012-2018)

Colorado State University, Department of Psychology

2012-present

Professor (Associate Professor from 2012-2018)

University of Colorado, Colorado School of Public Health

Substance use among American Indian youth: Epidemiology and Etiology

The major goals of this project are to track substance use trends among American Indian adolescents and identify malleable risk and protective factors.

2020-MU-MU-0017, National Institute of Justice (NIJ)

Augustyn (PI)

01/01/21-12/31/26

Life-course and intergenerational effects of criminal justice involvement: Identifying risks, the search for resilience, and the impact of the rise in opioid misuse and the Covid-19 pandemic

The major goals of this project are to understand the role that involvement with the criminal justice system plays in life course development. This study funds two rounds of new data collection for the focal participant from the Rochester Youth Development Study (G2) and the focal participant from the Rochester Intergenerational Study (G2's first born child - G3).

Buller/Sussman (PI)

09/15/22-09/14/27

#4Corners4Health: A Social Media Cancer Prevention Program for Rural Emerging Adults

The goal of this project is to improve cancer risk behavioral factors among diverse emerging adults aged 18-26 living in rural counties in the Four Corners states, -- a unique, underserved region, -- using a social media campaign designed with community advisors. This project brings together investigators at four NCI-funded Cancer Centers to develop and test the impacts of a social media-based intervention.

Role: Co-Investigator, PI of subcontract to CSU

Borrayo (PI)
06/01/21 – 06/30/27

Improving the Timeliness and Quality of Care for Rural Head and Neck Cancer Patients.

We will apply the CARES (Cancer Advocacy, Resources Education, and Support) intervention to target factors specific to rural LC and HNC patients who are underserved and factors that due to their statistical and clinical significance are associated with suboptimal initiation of treatment and poor quality of care for these patients. The hallmark of the CARES intervention is implementing it at key points during LC and HNC treatment, likely augmenting its effects on the outcomes more effectively and more efficiently than current usual care practices. Using a randomized controlled clinical trial (RCT) design, we will compare the CARES intervention effects to the effects of usual care practice on the: (a) time to treatment initiation and (b) time to treatment completion.

Role: Co-Investigator, Biostatistician

Laybourn (PI)

08/01/20-07/31/25

Northern Colorado Bridges to the Baccalaureate

The major goals of this project are to facilitate the successful transfer of community college students to a 4-year college (Front Range Community College to Colorado State University), and to provide opportunities for participation in undergraduate research. The program actively recruits students from under-represented groups in Science, Technology, Engineering, Math, and Medicine – including first generation college students; Black, Latino/a, and Native students; and students who grew up in socio-economically disadvantaged households.

Role: Co-Investigator

1930150, National Science Foundation (NSF)

Laybourn/Malara (PI)

08/15/19-07/31/24

Wolves to Rams Scholars Program

The major goals of this project are to facilitate the transition from Front Range Community College to Colorado State University and completion of a B.S. in a Science, Technology, Engineering, or Math (STEM) discipline among underprivileged students through a learning community and scholarships. The project also involves a longitudinal study of the impact of the scholarships on matriculation to a B.S. and entry into a STEM career.

Role: Co-Investigator/lead Scientist for research study

Buller/Walkosz (PI)

08/01/19 – 06/30/24

Using Technology to Scale-Up an Occupational Sun Protection Policy Program

We will model the effectiveness and cost trade-off, along with the extent and representativeness of reach, when scaling up our evidence-based occupational sun protection intervention, Sun Safe Workplaces (SSW), for national distribution. The intervention, which relies on personal contact with managers and in-person employee training (SSW-IP), created large improvements in comprehensive workplace sun safety (i.e., policy adoption and employee education) in a randomized controlled trial. We will compare the existing in-person program delivery methods (SSW-IP) to a lower-cost dissemination method that utilizes Internet technology (SSW-T), i.e., virtual meetings, social networking, online training, and program materials. The aims of the research are to: 1) estimate the program reach (number and representativeness) and implementation rates (i.e., adoption of policies and delivery of education on occupational sun protection) achieved by the SSW-IP and SSW-T in a model of national distribution to public safety and public works industries; 2) estimate the costs associated with the SSW-IP and SSW-T (i.e., intervention costs and induced employer costs) and compare the estimated program benefits (i.e., policy and education) to cost; and 3) estimate the effect and cost-effectiveness of SSW-IP and SSW-T in secondary outcomes of a) changes in workplace environments and procedures for sun safety and b) workers' sun safety practices.
